Spiros Karathanassis

Software Engineer

PROFILE

Spiros Karathanassis was born on 2 May, 1995 in Patras, Greece. He was studying in University of Patras in the Department of Computer Engineering and Informatics.

He is currently working as a Front-End Engineer, on a programmatic advertising ecosystem, with experience at supporting, testing, optimising, restructuring and debugging.

He is searching for job opportunities as a software engineer mainly in web development environments. Spiros's interests also regard smart devices apps, autonomous driving, AI applications, science analytics. Spiros is currently writing Python as a hobby and learning Laravel framework, because he really likes new technologies.

WORK EXPERIENCE

Mar 2020 - Present   Phaistos Networks

Front-End Engineer

I am working as a front-end developer where my role is to maintain, debug, design tests and optimise performance. I have also experience working on urgent client's tasks, leading a team and working on sprint tasks as also suggest better answers on things that could be able to improve user experience, performance and productivity.

PROJECTS

Debugger Chrome Extension

Implementation of catching advertising requests, handle ad bugs on publishers web pages. Reason to this project were that colleagues spend time(hours) to find bugs. Launch apps like these automate jobs where time can be useful.
Technologies used: React, Webpack, JS, SASS, HTML5, JSON

Extended Quiz Game

It's started as a Javascript Quiz Game to learn new technologies. After though, I decided to turn into a business tool where it can be useful. (Training new employees, interviewing coding questions, etc.)
Technologies used: Vue CLI with vue3, JS, SCSS, HTML5, JSON, Firebase api

Software Technology Project

This project specified the determination of rules that a small team works for client's request. Analysis, Design, Development, Testing, Deployment was the main cycle process of this work. Team plan, Project Description, Project plan, Risk assessment, designed UML diagrams and finally code in Java were the main features of the project.
